### REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: the combination of elements as claimed is deemed to be directed to an unobvious improvement over the invention patented by Adachi. Adachi discloses a control device comprising an adjusting element for the angular adjustment of a drive pinion (5) relative to a shaft (1), including a control valve for actuating the adjusting element and connected to chambers (12, 14) of the adjusting element, by working connections A and B; wherein the control valve includes a sliding valve control piston in a valve body, for setting different hydraulic resistances between each of the two working connections, and delivery (23a) and discharge (23d, 23e) connections of the control valve, respectively connected to a supply of hydraulic pressure (13) and tank (291; wherein in first and second positions, one or the other, respectively, of the two working connections is connected to the delivery connection and the other or the one, respectively, of the two working connections is connected to the discharge connection; and in a third position there is a high resistance between each of the connections, with a resistance between the discharge connection and one of the working connections is higher than the resistance between the discharge connection and the other of the working connections (e.g. column 7 line 50- column 8 line 8).

The difference comprises that the different resistances between the discharge connection and the work connections, when the control is in the third position, is caused by control edges of the valve body having different radii.

Note that Kirkbride teaches that control edges (34, 35, fig 4A) of a valve body can have the same radius; but does not teach the control edges of the valve body having different radii.

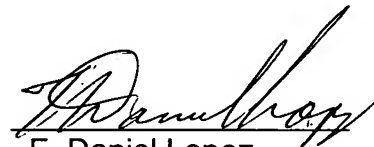

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, preferably **accompanies** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
